Annual report from University of Southern Denmark (SDU)

SDU has issued DOIs for the last 3 years. The service is tied to the Pure Office in the University Library is placed; the Pure Office is also lead on the Open Access work at the university.

Our main use for the DOI service is to Ph.d. thesis published af the university. We aim to make all thesis available Open Access, and therefor they all get a DOI when they are submitted into Pure.
Other than thesis, our researchers can contact us and request a DOI for their publication, protocol etc.

We don't have any plans for our repository, in term of development.

In terms of wishes for future development, an integration to Pure would be much appreciated – so we (or our users) would be able to create a DOI directly in Pure.

Pure serves as our repositoty. At the moment we don't have many datasets in Pure, so we don't have any FAIR policy attached to it.
