Planning a research project

FAIR data support project planning

www.vidensportal.deic.dk/FAIR
FAIR data support project planning

How?

- Define responsibilities for data management among the project partners, e.g. in a data management plan.

- Agree on common standards / conventions for collecting, storing and documenting the data.

- Ensure that all data from the project are shared on a common, secure platform.

Why?

- You save time introducing new members to the project.

- You avoid data loss when someone leaves the project.

- You enable easy reuse of data generated so far.

FAIR data are: **Findable**, **Accessible**, **Interoperable** and **Reusable.**

Making your data FAIR means maximizing the project's output, increasing your impact and enhancing your recognition as aresearcher.
